- Writing documentations with 'README.md'.
- Working in team - Solving problems.

Languages:

Arabic: Native Speaker.
Engilsh: Upper-intermediate Level.

Education:

4th year at Damascus University,
Faculty of Computer Engineering.

Projects:

- Real-Time Chat Website with Node js and Socket IO:
using Node js to create the server side with Socket io based on send
and receive events to create the Real-Time connection and deploy it to
heroku app "free node js hosting app".
https://chat-w-app.herokuapp.com

- Create Css framework using Sass:
using Sass with CSS4 flexibility to create reusable mixins, functions and maps,
and developing rules and classes that integrate with the backend to automate
the website building process.
http://webinjaz.com

- Websites in Web Injaz company:
The first and second websites I designed and coded as a frontend web developer in Web Injaz
company using HTML5/CSS3 and Bootstrap 3.37 with JQuery and Sass.
http://analys.webinjaz.com - http://dfskargo.com

- Graphic and Web Design:
using Adobe illustrator and Adobe Photoshop to design simple logos,
facebook posters, covers in RBCs Team and section titles for websites
in Web Injaz company.
 https://github.com/wael-zoaiter/graphic-design

- Other Frontend simple templates:
my very first trying in frontend development using HTML/CSS and JQuery.
https://frontend1-w-app.000webhostapp.com - https://frontend2-w-app.000webhostapp.com

- Hotel Reservation System using Yii2 PHP framework:
planning what hotel customers need in hotels online reservation to define the initial use cases and
start building the Database tables using MYSQL for the system, then sketching the UI accordingly then
code the initial design using HTML and Sass and building the backend with the needed functionality
using Yii2 (php framework).
Working on it ...

- Blog Website using Node js and Express js framework:
Blog web app where the user can Create, Read, Update and Delete thiere articles and interact with articles
created by the others. using Express js (Node js framework) for the backend and Bootstrap 4 with Sass for
the frontend and MongoDB as a database.
wait for it ...

- Blog Website using React js and Redux js framework:
Blog web app where the user can Create, Read, Update and Delete thiere articles and interact with articles
created by the others. using React js with Redux js and Bootstrap with Sass and MongoDB as a database.
wait for it ...

- Android App using React Native and Firebase, APK file:
Android App to allow the users to add, update and delete their own articels and read the others articles
using React Native with Redux js for state managment and React Navigation for navigation
and Firebase (database, rest api and cloud functions) as a database and AsyncStorage for caching
Working on it ...
